

"Quatred's staff was very professional." said Jay Trunnell, Information Technology Officer of Cucamonga Valley Water District. "They have the implementation process down to a science and provided complete documentation after the installation."

Jay Trunnell, Information Technology Officer

The Challenge

Cucamonga Valley Water District (CVWD) was in search of a better way to track inventory. The primary objective was to streamline and mobilize the picking of parts from the warehouse for specific jobs.

The Solution

QUICK® Public Administration Interface:

- Wireless freedom & flexibility
 - ✓ Work in the office over a wireless local area network (WLAN)
 - ✓ Work on the road over a wireless wide area network (WWAN)
- Online real-time access to Superior applications
- Offline capability when you're not connected
- Ability to design and print bar coded labels for inventory & assets
- Increased accuracy via bar code scanning
- Reduction in errors
 - ✓ Elimination of paperwork
- Elimination of information redundancy
 - ✓ Manually record transactions such as issues/returns and physical inventory
 - ✓ Entry of data at a later time
- Purchasing/Inventory
 - ✓ Physical Inventory
 - ✓ Issues/Returns
- Fixed Assets
 - ✓ Physical Inventory
- Asset II Management
 - ✓ Physical Inventory

The Results:

CVWD is very pleased with the solution Quatred implemented. The solution provides a simple interface that can easily be used by CVWD's non-technical staff to pull parts for jobs. The mobility of the devices makes it easy to record parts issues at the bins. As a result, they have increased the accuracy of inventory and job costing. The warehouse staff is thrilled to have this solution!

"I consider this to be an elegant, well written application. The user interface is very simple to use. We bought two separate types of mobile computers and both are remarkably rugged and easy to use."

Jay Trunnell, Information Technology Officer
