

"Prior to the implementation of Quatred's QUICK® Mobile Computing & Barcoding Interface for Superior's NaviLine solution, all inventory items issued to work orders were keyed in manually. Now, all of our transactions are processed with mobile computers "online" and in "real-time" yielding an extremely accurate inventory and a significant reduction in errors. We have expanded and now have the Mobile Receiving and Mobile Inventory Transfer Add-ons which has reduced the amount of time employees spend at their computers manually entering transactions. The changeover was painless and everything is very user friendly! The support we receive is outstanding! We couldn't be happier with the new efficiencies in our department!"

Christine Bonnenfant, Storekeeper

The Challenge:

Reduce or eliminate time spent manually entering inventory transactions while keeping more accurate records. Streamline the physical inventory process and ensure accurate counts. Eliminate redundant capture and entry of information

The Solution:

The QUICK® Purchasing/Inventory mobile interface which is essentially an extension of Superior's Purchasing/Inventory module functionality. This solution features:

- Wireless freedom & flexibility
 - ✓ Work in the office over a wireless local area network (WLAN)
 - ✓ Work on the road over a wireless wide area network (WWAN)
- Online real-time access to Superior applications
- Offline capability when you're not connected
- Ability to design and print bar coded labels for inventory & assets
- Increased accuracy via bar code scanning
- Reduction in errors
 - ✓ Elimination of paperwork
- Elimination of information redundancy
 - ✓ Manually record transactions such as issues/returns and physical inventory
 - ✓ Entry of data at a later time
- Purchasing/Inventory
 - ✓ Physical Inventory
 - ✓ Issues/Returns
- Fixed Assets
 - ✓ Physical Inventory
- Asset II Management
 - ✓ Physical Inventory

The Results:

The issuing and inventory count processes have become quicker and simpler. Errors are noticed and reconciled sooner. Time is saved by eliminating data entry

"Annual physical inventories have been streamlined due to the fact that all physical count data entry has been eliminated. The Mobile Interface saves time on the research of each item count that is off because the system is real-time. We are alerted to problems immediately rather than a month or two (or more) down the road which makes reconciling inventory much faster and easier. Quatred staff members are very friendly, extremely knowledgeable, and are patient with end users in resolving any issues that may arise. From a technical aspect, I greatly appreciate their ability and willingness to get on our system to make changes or teach us how to improve our processes."

Donna Crowley, IT Technician
