

"We have been very happy with the support services," said Cheryl Prevatte, Criminalistics Specialist for the Venice Florida Police Department. "There has been someone there to answer the phones and give support every time we have called. We are extremely satisfied!"

Cheryl Prevatte, Criminalistics Specialist

The Challenge

Before the Venice Police Department deployed the mobile computing/bar coding solution from Superior and Quatred, they were working with two different systems that were not integrated. They were looking for a way to combine the Superior Crimes system they already had in place with a fully integrated mobile computing/bar coding solution.

The Solution

QUICK® Public Safety Mobile Computing/Bar Coding Interface for Crimes. Features Include:

- (•) Online real-time access to Superior applications
 - (•) Work in the office over a wireless local area network (WLAN)
 - (•) Work on the road over a wireless wide area network (WWAN)
- (•) Streamlined processing via bar code scanning
- (•) Bar Code label design and printing capability
- (•) Evidence/Property Physical Inventory
- (•) Mass Update
- (•) Check In/Check Out
- (•) Property Tag Summary

The Results

Now Venice has a fully integrated solution that keeps track of all items in the evidence/property room. Cheryl is very happy about no longer having to make entries into two different systems. "We have seen destruction run processing cut back from days to hours!" says Michael Deneweth, Technical Systems Coordinator
