

The Challenge:

- Do you want to be able to update item locations from your mobile computer in the warehouse? If so, you should consider deploying the QUICK® Item Location Update add-on!

QUICK® Item Location Update Features:

- Online real-time access to NaviLine® Inventory.
- Scan NaviLine® item barcode and update the primary and/or alternate locations.
- You can perform the following actions:
 - ◆ Update the Primary Location
 - ◆ Clear the Primary Location
 - ◆ Update the Alternate Location
 - ◆ Clear the Alternate Location
- Authorization for location updates are granted by user.
