

The Challenge:

Are you tired of trying to read your crew's handwriting on printed work requests? Do you want to eliminate manually printing out works orders, manually recording comments, material, labor, meter functions and action taken? Do you want to eliminate redundant paperwork and significantly increase your accuracy through barcode scanning Where and when transactions occur?

If you answered "yes" to any of these questions, you should consider deploying the QUICK® Mobile Work Order Reporting Interface. It extends NaviLine's Customer Information Systems Miscellaneous Inventory Maintenance, Land Management Location Assignments and Work Order Reporting to wireless mobile computers.

QUICK® Features:

- Online real-time access to NaviLine® applications
- Increased inventory accuracy via scanning
- Reduction in errors due to the elimination of manual paperwork
- Elimination of information redundancy
 - ◆ Manually record transactions and enter them into NaviLine® at a later time.
 - ◆ Enter information at a later time
- Moves data entry responsibility to person performing task
 - ◆ Allows Work Order creation "on the fly"
 - ◆ Allows Work Order reporting
 - ◆ Allows a Miscellaneous Inventory Maintenance (Add, Change, Delete)
 - ◆ Allows Location assignments to miscellaneous inventory
 - ◆ Allows meter functions to be processed
 - ◆ Allows disconnected processing
