

Accela Mobile Inventory Interface

Quatred has partnered with Accela to deliver a mobile inventory interface that is a state-of-the-art SOA.NET solution. It enables inventory transactions to be processed online in real time. It is designed for ruggedized mobile computers and tablets so barcoding and/or RFID can be utilized to streamline operations.

QUICK[®] Mobile Inventory Features:

- Wireless freedom & flexibility
 - ◆ Work online in real time connected via Wi-Fi or Cellular Network
- Reduction in errors
 - ◆ Eliminates redundant paperwork
