

Accela Mobile Interface

Accela has partnered with Quatred to deliver a new mobile parking ticket interface with release 7.16.0 that is a state-of-the art SOA.NET solution. It enables parking ticket data to be downloaded to a ruggedized mobile computer so parking tickets can be processed without having to be connected to a wireless network. It includes a ruggedized weatherproof printer for violation printing. When a network is in range, violations can be uploaded to Accela for processing.

QUICK® Mobile Parking Violations Features:

- Wireless freedom & flexibility
- Allows the processing of parking tickets without being connected to a network
 - Issue parking tickets
 - Print parking tickets
 - Reprint tickets
 - Edit issued tickets
 - Check for Tow Notifications
- Reduction in errors
 - Eliminates redundant paperwork
 - Eliminates someone having to read illegible handwriting
- Increased efficiency
 - Eliminates data entry into Accela Parking Tickets
 - Generates parking tickets much faster than manually issuing them
