

**The Challenge:**

Are you tired of trying to reconcile which manufacturing part numbers correlate to your item numbers? Do you want to eliminate manually entering receiving information? Do you want to eliminate redundant paperwork and significantly increase your accuracy through barcode scanning at the point transactions occur?

If you answered "yes" to any of these questions, you should consider deploying the QUICK® Receiving Add-on Module! It allows you to receive goods with your mobile computers and verify receipts as they are processed. Best of all, you can scan your vendor's item numbers and the mobile computer will automatically cross reference their part number to your item number!

**QUICK® Receiving Add-on Features:**

- Online real-time access to NaviLine® purchase order information
- Increased accuracy via barcode scanning
- Reduction in errors due to the elimination of manual paperwork
- Elimination of information redundancy
  - ◆ Manually record received items & quantities
  - ◆ Enter information at a later time
- Moves data entry responsibility to person performing task
- Allows PO and/or item number scanning... including your vendor's part numbers
- Allows mobile user to view open PO item information
- Allows NaviLine® Purchase Order Receipts to be utilized so mobile receipts can be confirmed
